Number Line App from Math Learning Center. Number lines are a useful visual math tool for solving any number of math problems. And although you can certainly draw a quick number line on paper, this interactive tool is nice as well. And it can easily be cleared and reset when you're ready for a new math problem (unlike a hand drawn line).

Scavenger hunts are my go to math review activity. 10-12 problems are posted around the room, each page having the solution to a different problem. It functions like a loop. Students are paired (or in a trio) and move from problem to problem solving it, identifying the solution in the room, and then working that problem.

two or three seconds. Then cover it and ask the child to describe it. Move to more complicated pictures as the child's ability increases. Continue to play this "flash" game with variations.

Early Math: Introducing Geometry to Young Children ...

The inch marker has the longest line with the number next to it on the left. The middle line is the next longest. That marks half an inch. The other two lines on either side mark a quarter of an inch, 1 out of 4 parts of the inch or $1/4$, or one quarter. If the line stops at the third line on the inch, then that is $3/4$ of an inch. Give it a try.
