Vibration is a 640 square feet laboratory for research and educational activities. The laboratory offers opportunities for hands-on, project-based learning and is used in the Mechanical Vibrations (ME101), Advanced Mechanical Vibrations (ME401), and interdisciplinary Acoustics, Vibration and Noise Control (EID160) courses.

whereby oscillations occur about an equilibrium point. The word comes from Latin vibrationem ("shaking, brandishing"). The oscillations may be periodic, such as the motion of a pendulum—or random, such as the movement of a tire on a gravel road. Vibration can be desirable: for example, the motion of a tuning fork, the reed in a
