The Chief Information Security Officers
A chief information security officer (CISO) is the senior-level executive within an organization responsible for establishing and maintaining the enterprise vision, strategy, and program to ensure information assets and technologies are adequately protected. The CISO directs staff in identifying, developing, implementing, and maintaining processes across the enterprise to reduce information and information technology (IT) risks.

Chief information security officer - Wikipedia
The chief information security officer, or CISO, is the executive responsible for an organization's data and cybersecurity needs. Historically, CISOs have reported into the chief information officer (CIO), but the tide is changing. As cybersecurity becomes more critical to business operations, some CISOs now report into the risk officer, audit committee, general counsel or even directly to the CEO. When there is both a chief information security officer and a chief security officer (CSO) ...
